Continuation of 11. does NOT place the application in condition for allowance because: Applicant has not submitted an actual amendment but merely traverses the rejections by arguing that the "dyed" carpet of Example 2 of the Child reference is fixed dye rather than the presently claimed unfixed dye. The examiner respectfully disagrees since Example 2 states the following:

Example 1 was repeated except that the carpet was dyed with a solid

shade applicator (a Fluid Dyer manufactured by Kusters) before the application of the fiber degrading composition and the print pastes. The printed dyes were weaker and appeared more washed-out, and the sculptured areas appeared lighter than the rest of the carpet.

Thus, Example 2 is the same as Example 1 except for it is dyed with a solid shade applicator (i.e., overall dye) rather than the printed dye of Example 1. The rest of the features of the examples are presumed to be the same. Since Example 1 clearly teaches fixing the dye at the same time as activation of the sculpting liquor, it is reasonable to presume that the solid shade dye of Example 2 is not fixed until after application of the fiber degrading composition. Therefore, applicant's argument is found unpersuasive.

Applicant also argues that the examiner has not provided a proper source for the motivation to modify the Burns invention and that the rejection is based upon improper hindsight reconstruction. The rejection is not based upon knowledge gleaned from applicant's disclosure but rather is based upon knowledge of the prior art and general knowledge of one skilled in the art. The various aesthetic effects would be an inherent result of modifying the order and location of dye and fiber degrading composition. Additionally, in response to applicant's assertion that Burns teaches away from the claimed invention, separate application of said dye and fiber degrading composition does not necessarily mean the patterns of each are out of register. Therefore, applicant's argument is found unpersuasive.
